**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bischel et al. (US5544268).

Regarding Claim 18 and 28, Bischel et al. disclose in Fig.34 a device 900 for the wavelength tuning of an optoelectronic component array having at least two optoelectronic components, the device comprising: a respective at least one resistance heater 920 (col.3, 1.35-36) associated with each of the at least two optoelectronic components for setting a respective characteristic wavelength of the respective optoelectronic component; a common voltage or current source 926; and a respective heater arrangement 928 (col.17, 1.30-43) connected between each respective at least one heater and the common voltage or current source 926. Bischel et al. do not disclose the "total resistance of each respective resistor arrangement being variable so as to allow for wavelength tuning." However, it

would have been obvious to one of ordinary skill in the art at the time of the invention to modify Bischel et al. to include variable resistance arrangements to vary the total resistance for tuning the wavelength, since it has been held that the provision of adjustability, where needed, involves only routine skill in the art. In re Stevens, 101 USPQ 284 (CCPA 1954).

Regarding Claims 19-27 and 29-36, the particular claimed features are a matter of design choice since they do not solve any particular stated problem and the claimed invention will work with alternative/equivalent features known to one of ordinary skill in the art. Therefore, these claimed would have been obvious to one of ordinary skill in the art at the time of the invention.
